

Germán Camilo Bernal Ladino

Bogotá, Colombia | germanbernal02@gmail.com | +57 313 491 6799 | [linkedin.com/in/german-bernal-698067274](https://www.linkedin.com/in/german-bernal-698067274) | github.com/GermanB7

PROFESSIONAL SUMMARY

Backend Developer focused on Java, Spring Boot, REST APIs, PostgreSQL, Docker, CI/CD, and production-oriented backend systems. Professional full stack experience with Django/DRF, Vue, PostgreSQL, Redis, Docker, Celery, and GitLab CI/CD. Public Java/Spring Boot projects demonstrate modular architecture, transactional workflows, authentication, event-driven design, testing, observability, and operational documentation.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, Spring Security, Spring Data JPA, Django, DRF, REST APIs, JWT, Celery

Data & Messaging: PostgreSQL, Redis, Kafka, Flyway, Transactional Outbox, Event-Driven Workflows

DevOps & Quality: Docker, Docker Compose, GitHub Actions, GitLab CI/CD, Maven, JUnit, Pytest, MockMvc, Postman, Swagger/OpenAPI

Observability: Actuator, Micrometer, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Full Stack Developer | Infometrika SAS - Project Argo / SISDH | Bogotá | Mar 2025 - Aug 2025

- Contributed to SISDH, a Human Rights Monitoring System for a public-sector client, across backend, frontend, tests, documentation, and stakeholder validation.
- Built backend functionality with Django, DRF, Celery, PostgreSQL, Redis, Docker, and GitLab CI/CD, applying layered architecture and service-oriented design practices.
- Contributed Vue 3 / Vuetify 3 features, wrote Pytest unit tests, and documented technical flows in Wiki.js.

Cofounder & Full Stack Developer | Festy - Event Management Platform | Bogotá | Jan 2024 - Dec 2024

- Led technical development of a mobile-first event platform using Flutter, Django, PostgreSQL, JWT authentication, REST APIs, and modular backend design.
- Reached MVP stage with 100+ downloads and supported early commercial partnerships with bars and venues in Bogotá.

Web Developer | Elevation Lounge Barber | Bogotá | Nov 2023 - Feb 2024

- Built a web booking platform using React/Next.js and Firebase to support appointment scheduling and customer interaction.
- Automated manual reservation coordination, improving operational visibility for a small service business.

SELECTED PROJECTS

RelaxOS | Java 21, Spring Boot, React, PostgreSQL, Docker, Flyway, JWT, GitHub Actions | github.com/GermanB7/RelaxOs

- Built a modular-monolith decision system for move-out scenarios, expenses, scoring, risk detection, recommendations, adaptive modes, meals, dashboard aggregation, admin flows, and backup/restore scripts.
- Implemented backend-owned deterministic rules for scoring, risk analysis, scenario comparison, transport evaluation, and recommendation lifecycle management.
- Added JWT authentication, ownership checks, Flyway migrations, Docker dev/prod-like configuration, CI validation, backend tests, frontend build checks, and operational documentation.

Neobank Backend | Java 21, Spring Boot, PostgreSQL, Redis, Kafka, Flyway, Docker, Prometheus/Grafana |

github.com/GermanB7/neobank-backend

- Built a finance-style backend focused on transactional money movement, account ownership, transfer lifecycle, ledger recording, reversals, reconciliation, auditability, and operational recovery.
- Implemented transactional boundaries, deterministic account locking, double-entry ledger validation, role/ownership authorization, transactional outbox, Kafka publication, and observability with Actuator, Micrometer, Prometheus, and Grafana.

Event-Driven Order Management System | Java 21, Spring Boot, PostgreSQL, Kafka, Flyway, Docker, Micrometer |

github.com/GermanB7/event-driven-order-management-system

- Built an order orchestration backend with modular boundaries for orders, inventory, payments, shipping, workflow, messaging, outbox, observability, and shared primitives.
- Implemented transactional outbox, Kafka async delivery, idempotent consumers, retry/backoff, DLQs, replay endpoint, saga orchestration, compensation flows, integration tests, and architecture tests.

EDUCATION

Universidad Nacional de Colombia | Ingeniería de Sistemas y Computación | Expected graduation: 2027

- Focus: backend engineering, software architecture, data structures, databases, distributed systems, and systems design.

CERTIFICATIONS & LANGUAGES

- Certifications: Algorithms Specialization - Stanford University, 2026; Oracle Next Education F2 T7 Back-end - Oracle / Alura Latam, 2025; Data Science Specialization - Universidad de los Andes, 2024; The Complete 2024 Web Development Bootcamp - Udemy, 2024.
- Languages: Spanish - Native; English - C1 Professional Working Proficiency; German - A1 planned/in preparation.
